1 Summary Automatic

0	0	0	0
reported incidents	other reports	map objects	sources

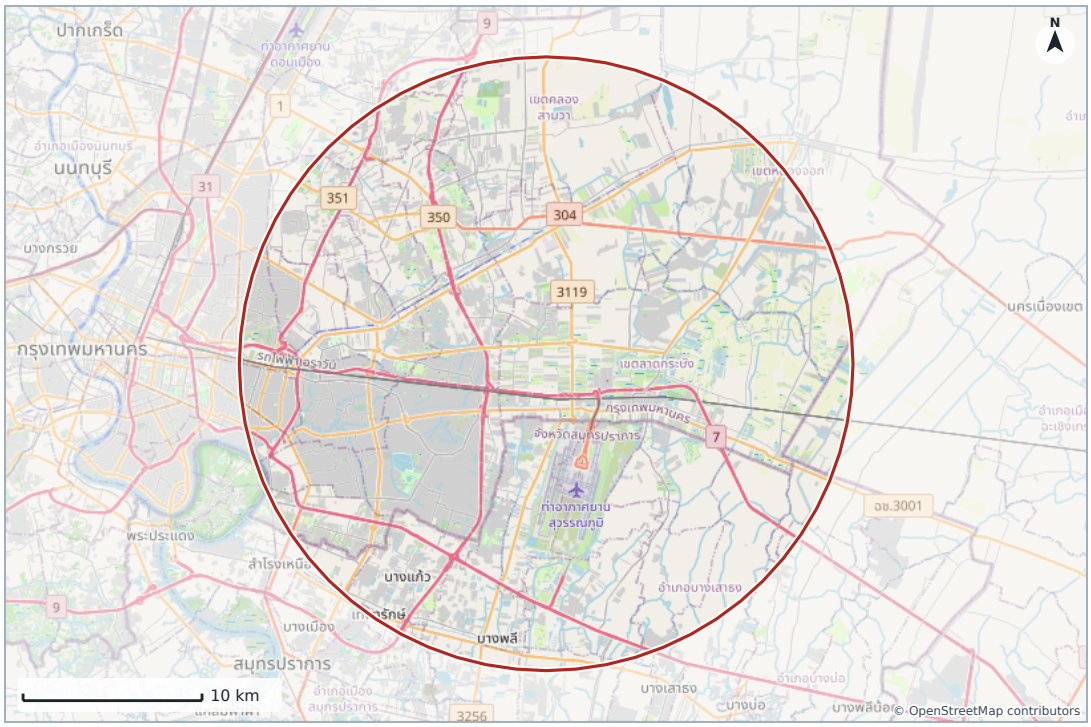

No report inside the area for last 24 hours. Widen the period above or draw a larger area.

491 reports have no map location and names no place inside the area, so they are left out.

Nothing in this report is confirmed. "Reported" means a named source said it; government figures are the government's claims, and a credible source can still be wrong. Casualty figures are never added up, because several reports may describe one incident. Every row links to its source and carries a SHA-256 fingerprint.

2 Overview map

KEY

Drawn area

Positions are as precise as each source allows. Grid references are MGRS.

3 Reported incidents (0)

Reports that describe shooting, explosions, mines, incidents at sea or harm to civilians, picked by fixed words (no AI), or rated high severity by OSAP's rules. Newest first.

None for last 24 hours.

4 Other reports and records (0)

Official records, news, social posts from official and news accounts, open data and neighboring countries' reports inside the area, plus unmapped reports that name a place in it. Newest first.

None for last 24 hours.

5 Map objects (0)

Points on the map inside the area when the report was made: terrain, flashpoints, crossings, sites, infrastructure and live tracks, whatever overlays are switched on. These are reference layers, not reports. Switch on more in Map overlays to include them.

None for last 24 hours.

Report fingerprint (SHA-256 over the row fingerprints above, in order): `e3b0c44298fc1c149afbf4c8996fb92427ae41e4649b934ca495991b7852b855`

Built in the browser from what OSAP holds and shows for this area; nothing was changed. Sources are linked, not stored. Base maps: © OpenStreetMap contributors; borders: Natural Earth (public domain). Symbols: NATO-style (APP-6) from milsymbol (MIT); OSAP never marks anyone as hostile or friendly.
